To whom it may concern:

Formerly, I was a classical violinist working with the London Symphony Orchestra and *co-leader* of Royal Philharmonic Concert Orchestra. Adaptable, responsive, creative and with attention to fine detail.

Web and software developing has always been a career that I wanted to pursue and held a fascination for me. For over a year, due to Covid19, I haven't been able to work as a musician and with this financial constraint, have taken time out of an honours degree course with the Open University in Mathematical Sciences and Statistics, leaving me able to dedicate and structure my time to focus solely on this new career direction in code.

Learning and consuming as much information as possible is a passion and I am keen to collaborate and work as part of any sized team, fully immersing myself in a role whilst learning from more experienced team members. I hope to make valuable contributions to any projects we work on together in the future.

Thank you for taking the time to read this letter. My CV is also attached to this application.

 I hope to hear from you soon.

Sincerely**,**

Rob Yeomans

PROFILE

Formerly, I was a classical violinist working with the London Symphony Orchestra and *co-leader* of Royal Philharmonic Concert Orchestra. Adaptable, responsive, creative and with attention to fine detail.
Coding and web developing has always been a career that I wanted to pursue and held a fascination for me. For the past year, I have been able to dedicate and structure my time to focus solely on this new career direction. My hobbies include cycling, swimming, running, kayaking and racing triathlons
